1. Platform Overview

20 Q&A pairs

Q1 (#1): What is Fixy?

A: Fixy is a smart home repair platform (service marketplace) that connects customers needing services (plumbing, electrical, HVAC, carpentry, etc.) with qualified technicians. It provides a secure end-to-end workflow: service request creation, technician bidding, AI-ranked recommendations, escrow payment, dispute resolution, and a rating system.

Q2 (#2): Who can use Fixy?

A: Fixy supports three types of users: (1) Customers – people who need home services. (2) Technicians – qualified service providers. (3) Administrators – platform staff who manage accounts, resolve disputes, and monitor the system.

Q3 (#3): What services does Fixy support?

A: Fixy supports predefined service categories such as Plumbing, Electrical, HVAC, Carpentry, and other home repair/maintenance trades. Each service request and each technician is tied to exactly one category.

Q4 (#4): What makes Fixy different from traditional service booking?

A: Fixy combines AI-powered technician ranking, anomaly detection for feedback fraud, an escrow-based payment system that protects both parties, and a structured dispute resolution mechanism. Unlike traditional methods, everything is transparent, secure, and automated.

Q5 (#5): Is Fixy a mobile or web application?

A: Fixy has both a Flutter-based mobile application and a web application frontend, backed by a shared backend API and business logic layer.

Q6 (#6): Who built Fixy?

A: Fixy was built as a senior graduation project by a team of students at the Faculty of Computers and Artificial Intelligence, Benha University, Egypt (2026), under the supervision of Dr. Ahmed Tawfik, Eng. Mohammed Rafat, and Eng. Mawada Ashraf.

Q7 (#7): What types of services does Fixy support?

A: Fixy supports any home repair or maintenance service that falls under a predefined category, such as Plumbing, Electrical, HVAC (heating/ventilation/air conditioning), and Carpentry. Each technician registers under exactly one category.

Q8 (#8): Who are the main users of Fixy?

A: There are three user roles: (1) Customers — people who need services; (2) Technicians — qualified professionals who provide services; (3) Administrators (also called Customer Service) — platform operators who manage accounts, resolve disputes, and oversee the system.

Q9 (#9): Is Fixy available as a mobile app?

A: Yes, Fixy is implemented as a Flutter mobile application for customers and technicians, as well as a web application for the administrative panel. The backend serves both the mobile and web frontends.

Q10 (#10): What problem does Fixy solve?

A: Fixy solves the core problems of traditional service markets: lack of trust between customers and technicians, inefficient technician selection, risk of payment disputes, and absence of quality assurance. It addresses these through escrow payments, AI-powered recommendations, anomaly detection on reviews, and formal dispute handling.

Q11 (#11): How does Fixy make money?

A: Fixy charges a 10% platform commission on every service transaction. This commission is deducted from the customer's payment at the time of booking and is retained by the platform regardless of most outcomes. In the case of service non-completion or cancellation, the commission is refunded to the customer.

Q12 (#12): What technologies does Fixy use?

A: The mobile app is built with Flutter, the backend handles business logic with an application layer, data is managed through a database layer, and AI models (for rating calculation and anomaly detection) are integrated. Version control is managed via Git.

Q13 (#13): What countries or regions is Fixy available in?

A: Fixy is currently designed for the Egyptian market, with the interface and payment examples using EGP (Egyptian Pound). Expansion to other regions would require localisation of payment gateways, currency, regulatory compliance, and language support.

Q14 (#14): What languages does Fixy support?

A: The current version of Fixy is built for Arabic and English-speaking users in Egypt. The Flutter mobile app and web panel support both languages. Contact support if you need additional language support.

Q15 (#15): Does Fixy have a web version for customers?

A: The administrative panel is web-based. The primary customer and technician experience is delivered through the Flutter mobile app (iOS and Android). A customer-facing web portal may be available in future releases.

Q16 (#16): How do I contact Fixy support?

A: You can reach Fixy support through the in-app support chat, via email at support@fixy.app, or by calling the customer service hotline listed in the app. Administrators (Customer Service) handle account issues, disputes, and escalations.

Q17 (#17): What are Fixy's operating hours?

A: The Fixy platform operates 24/7 for service request creation, offer submission, and payment processing. Human administrator support (for account approvals, disputes, and escalations) is available during business hours. Response times may vary outside working hours.

Q18 (#18): Is there a Fixy app for iOS and Android?

A: Yes. Fixy is available as a native mobile application built with Flutter, which supports both iOS (App Store) and Android (Google Play). The same backend serves both platforms.

Q19 (#19): Does Fixy charge customers any fees beyond the service price?

A: No hidden fees are charged to customers beyond the agreed service price. The 10% platform commission is already factored into the payment flow — the customer pays the full agreed amount and the platform deducts its fee internally before holding the technician's escrow.

Q20 (#20): Can businesses or companies register on Fixy, or only individuals?

A: Currently Fixy supports individual customer and technician accounts verified by National ID. Business accounts or corporate service contracts are not part of the current feature set. Contact the Fixy business team for enterprise arrangements.

2. Registration & Account Management

28 Q&A pairs

Q21 (#1): How do I register as a customer on Fixy?

A: Go to the Registration page, select 'Customer', provide your National ID (government-issued identification), and accept the Terms of Service. Your account will be created with an Inactive status and will be activated after administrator approval.

Q22 (#2): What information do I need to register as a customer?

A: You need: (1) National ID – for identity verification, and (2) Acceptance of the Terms of Service. No other mandatory fields are required for customer registration.

Q23 (#3): Can I use the platform immediately after registering as a customer?

A: No. After registration, your account status is Inactive. You can only access core platform features (such as creating service requests) after an administrator approves your account.

Q24 (#4): How long does customer account approval take?

A: Approval is performed by an administrator who reviews your National ID and registration data. Processing time depends on admin availability, but you will receive a notification once your account is approved or rejected.

Q25 (#5): What happens if my customer account registration is rejected?

A: You will receive a notification explaining the rejection reason. You may re-register with corrected information if applicable.

Q26 (#6): How do I register as a technician on Fixy?

A: Go to the Registration page, select 'Technician', and provide: (1) National ID, (2) your Service Category (exactly one, e.g. Plumbing), and (3) your Initial Location (geographic coordinates). A profile picture is optional. Your account will be Inactive until approved by an administrator.

Q27 (#7): Can a technician register for multiple service categories?

A: No. A technician must select exactly ONE service category. Multiple categories are not permitted. If you work across multiple trades, a separate account would be required per platform policy.

Q28 (#8): Why does a technician need to provide their location at registration?

A: The initial location is used to set your base location for proximity-based service request matching. Customers and the system use this to determine relevant nearby service requests for your specialty.

Q29 (#9): Can I change my service category after registration?

A: The system does not allow changing the service category after account creation. To offer a different category, you would need to create a new account.

Q30 (#10): When can a technician start viewing and accepting service requests?

A: Only after your account has been approved by an administrator. Until then, you cannot view service requests, submit offers, or access core platform features.

Q31 (#11): Who approves new accounts on Fixy?

A: Only users with the Administrator role can approve or reject new customer and technician accounts.

Q32 (#12): What does the administrator check during account review?

A: Administrators review: (1) National ID authenticity, (2) submitted service category for technicians, (3) other registration data. They verify identity and then either Approve (activating the account) or Reject (with a documented reason).

Q33 (#13): What happens after my account is approved?

A: Your account status changes from Inactive to Active. You receive a notification with next steps. Customers can then create service requests; technicians can discover and bid on service requests.

Q34 (#14): Why is my account showing as 'Inactive' after I registered?

A: All newly registered accounts (both customer and technician) start with an 'Inactive' status. This is by design — your account must be reviewed and approved by an administrator before you can access the platform. You will receive a notification once your account is approved or rejected.

Q35 (#15): How long does account approval take?

A: The functional requirements do not specify an exact approval time — it depends on the administrator's review schedule. You will receive a notification (email or push) as soon as an administrator approves or rejects your account.

Q36 (#16): What happens if my registration is rejected?

A: If an administrator rejects your registration, you will receive a notification explaining the reason for rejection. You may be able to re-register with corrected or additional information, depending on the rejection reason.

Q37 (#17): Can I use the app before my account is approved?

A: No. Customers cannot create service requests and technicians cannot view service requests or submit offers until their account is approved and set to 'Active' by an administrator.

Q38 (#18): What information does the administrator check during account approval?

A: The administrator reviews your submitted National ID, verifies its authenticity, and for technicians also checks the service category selection and initial location. The goal is to ensure platform security and quality by validating user credentials before granting access.

Q39 (#19): Can I add a profile picture as a technician?

A: Yes, a profile picture is an optional field during technician registration. It is recommended as it enhances your profile credibility and builds customer trust. You can add or update it during or after registration.

Q40 (#20): What is required to accept the Terms of Service?

A: Customers must explicitly acknowledge and accept the platform's Terms of Service as part of the registration process. This is a mandatory step — without accepting, registration cannot be completed.

Q41 (#21): Can I register using my phone number instead of a National ID?

A: No. National ID is mandatory for both customer and technician registration. Phone number may be used for notifications and account recovery, but it does not replace the identity verification requirement.

Q42 (#22): How do I reset my password if I forget it?

A: Use the 'Forgot Password' option on the login screen. The system will send a password reset link to your registered email address or a verification code to your registered phone number. Follow the instructions to create a new password.

Q43 (#23): Can I have both a customer and a technician account?

A: You may create separate accounts for each role using different credentials, but each account requires a valid National ID. Using the same National ID for both roles may be flagged during the approval process. Contact support for clarification on dual-role arrangements.

Q44 (#24): How do I update my profile information after registration?

A: You can update your profile details (phone number, profile picture, bank account details) through the app's Profile Settings screen. Core identity information (National ID) cannot be changed after registration — contact support if there is an error.

Q45 (#25): Can a technician change their registered bank account for withdrawals?

A: Yes. Technicians can update their registered bank account or payment method through the app's Earnings & Withdrawal settings. The new account must be verified before it can be used for withdrawals.

Q46 (#26): What happens to my account if I am inactive for a long time?

A: Inactive accounts are not automatically deleted. However, the platform reserves the right to suspend accounts that show extended inactivity or no completed transactions, in line with the terms of service. You will receive a warning notification before any action is taken.

Q47 (#27): Is my National ID stored securely?

A: Yes. National ID data is encrypted at rest and in transit. It is used solely for identity verification during the account approval process and is not shared with third parties. Fixy complies with applicable data protection regulations.

Q48 (#28): Can I delete my Fixy account?

A: You can request account deletion through the app's Settings menu or by contacting support. Accounts with active bookings or pending disputes cannot be deleted until those are resolved. Completed transaction records may be retained for legal and financial compliance purposes.

3. Service Requests

25 Q&A pairs

Q49 (#1): How do I create a service request?

A: Log in as an approved customer, navigate to 'Create Service Request', and fill in: (1) Service Category – must match a predefined system category, (2) Description – detailed explanation of work needed, (3) Location – address or coordinates, and (4) Schedule – preferred date and time. Optionally attach supporting photos.

Q50 (#2): What information is required to create a service request?

A: Required: Service Category, Description, Location, and Schedule. Optional: Photos/images to help technicians understand the job scope.

Q51 (#3): When can technicians see my service request?

A: Your service request becomes immediately visible to qualified technicians (those with the matching service category) upon creation.

Q52 (#4): Can I create a service request before my account is approved?

A: No. You must have an Approved (Active) customer account to create service requests.

Q53 (#5): Can I attach photos to my service request?

A: Yes. Uploading supporting photos is optional but strongly recommended as it helps technicians better assess the work required and submit more accurate price offers.

Q54 (#6): Can I edit my service request after creating it?

A: Yes, but only under two conditions: (1) A technician has requested additional information or clarification, or (2) No price offer has been accepted yet by you.

Q55 (#7): What fields can I edit in a service request?

A: You can edit: Service Description, Images (add/remove/replace), Location details, and Schedule preferences. You cannot change the Service Category after creation.

Q56 (#8): What happens to existing price offers when I edit my service request?

A: All existing price offers are automatically invalidated when you edit a service request. Technicians who previously submitted offers are notified and must re-evaluate and resubmit new offers based on the updated requirements.

Q57 (#9): Can I edit a service request after accepting an offer?

A: No. Once a price offer has been accepted and a booking is created, the service request is locked and cannot be edited.

Q58 (#10): Can I change the service category of my request?

A: No. The service category cannot be changed after initial creation. If you need a different category, you must create a new service request.

Q59 (#11): Can I change the service category after submitting a request?

A: No. The service category cannot be changed after the initial creation of a service request. If you selected the wrong category, you must cancel the current request and create a new one with the correct category.

Q60 (#12): Can I edit my service request after submitting it?

A: You can edit your service request under two conditions: (1) a technician has formally requested additional clarification, or (2) no price offer has been accepted yet. You can edit the description, images, location, and schedule. Note: editing automatically invalidates all existing price offers, and all technicians who submitted offers will be notified.

Q61 (#13): What happens to existing offers when I edit my service request?

A: All previously submitted price offers are automatically invalidated the moment you edit your service request. Technicians who submitted offers will receive a notification informing them that their offer is no longer valid and that they may submit a new offer based on the updated requirements.

Q62 (#14): Can I edit my service request after accepting an offer?

A: No. Once you have accepted a price offer and a booking is created, the service request is locked and cannot be edited. The terms of the accepted offer are binding.

Q63 (#15): Who can see my service request?

A: Your service request is visible only to approved technicians whose registered service category exactly matches the category you selected, and who are within a reasonable geographic proximity to the service location.

Q64 (#16): How do I cancel a service request?

A: Before accepting any offer, you can cancel your service request. After an offer is accepted and a booking is created, cancellation follows the dispute and exception handling process. Administrators can cancel fraudulent or inappropriate requests in exceptional circumstances.

Q65 (#17): What is the status flow of a service request?

A: A service request follows this flow: Open (visible to technicians) → In Progress (offer accepted, booking created) → Pending Customer Confirmation (technician marked complete) → Completed (customer confirmed). It may also enter Disputed or Cancelled/Reopened states.

Q66 (#18): Can I create multiple service requests at the same time?

A: Yes, the platform allows customers with approved accounts to create service requests. The system does not explicitly limit the number of concurrent open requests, so you can have multiple active requests across different service categories.

Q67 (#19): Can I see the history of my past service requests?

A: Yes. The app maintains a complete history of all your service requests including Open, In Progress, Completed, Cancelled, and Disputed statuses. Navigate to 'My Requests' or 'History' in the app to view past activity.

Q68 (#20): Can I reuse a previous service request as a template?

A: The current system does not have a 'duplicate request' feature. However, you can create a new service request and manually fill in similar details. This feature may be added in future releases.

Q69 (#21): How detailed should my service request description be?

A: The more detail you provide, the better. Include the specific problem (e.g., 'kitchen sink pipe leaking under the cabinet'), the approximate age of the fixture, any previous repair attempts, and the urgency. Detailed descriptions help technicians submit accurate price offers and reduce the need for clarification rounds.

Q70 (#22): Can I request an urgent or same-day service?

A: Yes. When setting the Schedule field in your service request, you can select today's date and a time slot indicating urgency. Technicians with availability can then submit offers. Note that urgency does not guarantee immediate response — it depends on technician availability in your area.

Q71 (#23): What happens to my service request if I do not accept any offer within a certain time?

A: Service requests do not expire automatically. They remain active and visible to technicians until you cancel the request, accept an offer, or the request is closed by an administrator for policy reasons.

Q72 (#24): Can a technician message me about my service request before submitting an offer?

A: Technicians can formally request additional clarification through the platform, which triggers your ability to edit the service request. Direct messaging before an offer is submitted may be available depending on the app version. Check the platform messaging feature in the app.

Q73 (#25): Is my home address visible to all technicians?

A: Technicians can see the general service location to assess proximity and relevance. Precise address details are shared with the selected technician only after a booking is created, protecting your privacy during the open bidding phase.

4. Technician Discovery & Price Offers

28 Q&A pairs

Q74 (#1): How does a technician update their location?

A: Technicians can manually update their geographic coordinates at any time through the app interface. There is no limit on the frequency of location updates.

Q75 (#2): Why should a technician keep their location updated?

A: Location is used for proximity-based service request matching and directly affects your ranking in the AI recommendation system. An accurate location ensures you see the most relevant nearby service requests.

Q76 (#3): Does the system use real-time GPS tracking?

A: The system supports manual location updates that take effect immediately. The updated location replaces the previous one and becomes the active reference for all distance calculations.

Q77 (#4): What service requests can a technician see?

A: Technicians see only: (1) Requests matching their registered service category, (2) Requests within geographic proximity, and (3) Active requests that do not yet have an accepted offer. Completed or cancelled requests are not shown.

Q78 (#5): How are service requests sorted for technicians?

A: By default, service requests are sorted by proximity – nearest requests first.

Q79 (#6): What information is shown to a technician about a service request?

A: Technicians can see: Service description, Customer location (distance from technician), Preferred schedule, Supporting images (if provided), and the Service request creation date.

Q80 (#7): How does a technician submit a price offer?

A: Navigate to a service request and submit a Fixed Price (total cost including labor and materials), a Service Timeline (estimated completion date/time), and optional Additional Notes or conditions.

Q81 (#8): Can a technician submit more than one offer on the same service request?

A: No. A technician can submit only ONE price offer per service request. To change the offer, the technician must withdraw the existing offer and submit a new one.

Q82 (#9): Can a technician modify an offer after submitting it?

A: No. Once submitted, the offer price is binding and cannot be modified directly. The technician must withdraw the offer and resubmit to change any details.

Q83 (#10): How long is a price offer valid?

A: An offer remains valid until: (1) The customer accepts another technician's offer, (2) The service request is cancelled, or (3) The customer edits the service request (which auto-invalidates all offers).

Q84 (#11): Can the customer see all submitted offers?

A: Yes. All submitted price offers are visible to the customer who created the service request.

Q85 (#12): How do I find service requests near me as a technician?

A: After your account is approved, go to 'Nearby Requests' in the app. You will see a list of active service requests that match your registered service category and are within a reasonable geographic distance from your current location. Requests are sorted nearest-first by default.

Q86 (#13): How do I update my location as a technician?

A: You can manually update your current geographic location at any time through the app interface. There is no limit on how often you can update your location. The new location immediately becomes the active reference point for proximity-based matching and ranking.

Q87 (#14): How do I submit a price offer?

A: Open a service request from your nearby requests list, then submit an offer by entering: your fixed total price (covering labor, materials, and all service costs), an estimated service timeline or preferred date, and optional notes or terms. You can submit only one offer per service request.

Q88 (#15): Can I change my price offer after submitting it?

A: No. Once submitted, a price offer is binding and cannot be directly modified. If you need to change your price, you must withdraw the existing offer and submit a new one. Note that if the request has been edited by the customer in the meantime, your original offer would have been automatically invalidated anyway.

Q89 (#16): Can I submit offers on requests outside my service category?

A: No. Technicians can only view and submit offers for service requests that exactly match their registered service category. The platform filters requests automatically based on your category.

Q90 (#17): How are technicians ranked when a customer views offers?

A: Technicians are ranked by the rule-based recommendation module in this order: (1) Rating Score — highest first; (2) Distance — if within 25 km of the service location; (3) Offer Price — lowest first; (4) Cancellation Rate — lowest first; (5) Completed Jobs — most first. New technicians receive a baseline score.

Q91 (#18): What information does the customer see about me when viewing my offer?

A: The customer sees your technician profile summary (which may include your name, category, rating, profile picture), your offer amount, service timeline, and any notes you added. Your ranking position in the offer list is determined by the recommendation module.

Q92 (#19): What happens after my offer is accepted by a customer?

A: You will receive a notification that your offer was accepted. The customer's payment (100%) is processed and held in escrow (90% for you, 10% platform fee). A booking is created with all service details. You must then perform the service and mark it as completed in the app when done.

Q93 (#20): What happens to my offer if the customer accepts another technician's offer?

A: You will receive an offer rejection notification informing you that another technician was selected for this service request. Your offer is automatically rejected, and you are free to submit offers on other requests.

Q94 (#21): Can I see other technicians' offer amounts?

A: The functional requirements specify that all submitted offers are visible to the customer who created the service request. Technician-to-technician visibility of competing offers is not specified, so assume only the customer can compare offers.

Q95 (#22): What should I include in my price offer notes?

A: Include any conditions, assumptions, or clarifications that affect your price — for example, 'price assumes materials are standard grade', 'includes up to 2 hours of labour', or 'additional cost if pipe access requires wall cutting'. Clear notes protect both parties and reduce disputes.

Q96 (#23): Can I offer a discount or promotional price on Fixy?

A: Technicians set their own fixed prices per offer. There is no built-in discount or promo code mechanism for individual offers. You can simply set a competitive price that reflects any discount you wish to offer.

Q97 (#24): How do I build a good reputation on Fixy as a new technician?

A: Start by submitting competitive, well-detailed offers. Communicate clearly with customers, arrive on time, and complete work to a high standard. Early positive reviews build your rating quickly. The system's neutral baseline score gives you a fair starting point in the ranking algorithm.

Q98 (#25): Does Fixy verify that technicians are actually qualified for their service category?

A: During registration, the administrator verifies the technician's National ID and registration data. Fixy does not currently conduct trade certification verification (e.g., plumbing licence checks) at the platform level. Customers are encouraged to review ratings, completed jobs, and reviews when selecting a technician.

Q99 (#26): Can a customer search for a specific technician by name?

A: The current platform discovery flow is request-driven: customers post requests and technicians submit offers. There is no directory-style search for technicians by name. Technicians are surfaced through the recommendation system after submitting offers.

Q100 (#27): What is the maximum number of offers a customer can receive on one service request?

A: There is no cap on the number of offers a service request can receive. Any qualified technician within range who has not already submitted an offer can bid. The recommendation module then ranks all received offers for the customer.

Q101 (#28): Can I withdraw my offer if I change my mind?

A: Yes. Technicians can withdraw a submitted offer at any time before the customer accepts it. After withdrawal, you may submit a new offer on the same request if it is still open and unedited.

5. AI Technician Recommendation System

10 Q&A pairs

Q102 (#1): How does Fixy recommend technicians?

A: Fixy uses a rule-based recommendation module that ranks technicians who submitted offers based on multiple factors. The ranking determines the order in which technicians are displayed to the customer.

Q103 (#2): What factors are used to rank technicians?

A: The ranking considers: (1) Technician Rating – historical performance score from customer feedback, (2) Geographic Distance – proximity to the service location, (3) Completion History – number of successfully completed jobs, and (4) Response Behavior – average response time, offer acceptance rate, cancellation rate, and reliability metrics.

Q104 (#3): In what order are technicians ranked?

A: Technicians are sorted: first by Rating Score (highest to lowest), then by Distance (if within 25 km), then by Price, then by Cancellation Rate and number of completed jobs.

Q105 (#4): Can I choose a technician who is not the top-ranked one?

A: Yes. Customers retain full autonomy to select any technician regardless of their ranking. The ranking is a recommendation, not a restriction.

Q106 (#5): Do new technicians get disadvantaged in the ranking?

A: No. New technicians with limited history receive a neutral baseline score to ensure fair opportunity in the marketplace.

Q107 (#6): When is the ranking applied?

A: The ranking is automatically applied whenever the customer views the price offers for their service request.

Q108 (#7): How often is the recommendation model updated?

A: The rule-based ranking is recalculated in real-time each time a customer opens the offers page. It always reflects the latest rating, distance, and performance data. The underlying ranking rules themselves are periodically reviewed and updated by the Fixy product team based on platform performance data.

Q109 (#8): Can Fixy explain why a specific technician was ranked first?

A: The ranking is determined by a transparent rule-based algorithm: rating → distance → price → cancellation rate → completed jobs. The customer can infer the ranking rationale from the technician's visible profile data (rating, distance, price, jobs completed). An explicit 'why ranked here' explanation feature may be available in future versions.

Q110 (#9): Does the recommendation system consider time of day or availability?

A: The current recommendation module does not factor in real-time technician availability or time-of-day preferences. Ranking is based on rating, proximity, price, cancellation rate, and completed jobs. Availability is implicitly reflected by whether a technician submits an offer.

Q111 (#10): Will the AI recommendation ever automatically assign a technician without my consent?

A: No. The recommendation system only ranks and displays technicians — it never automatically books or assigns one. The customer always makes the final selection manually.

6. Booking & Payment

29 Q&A pairs

Q112 (#1): How do I accept a price offer?

A: As a customer, open your service request, review the ranked list of offers, and select Accept on the offer you choose. This initiates the payment and booking process.

Q113 (#2): Can I accept more than one offer?

A: No. You can accept only ONE price offer per service request. All other offers are automatically rejected when you accept one.

Q114 (#3): What happens to other technicians after I accept an offer?

A: All other technicians whose offers were not accepted receive a notification that another technician was selected. Their offers are automatically rejected.

Q115 (#4): How does payment work on Fixy?

A: When you accept an offer, you pay 100% of the agreed service price upfront. The payment is immediately split: 10% goes to the platform as a commission fee, and 90% is held in escrow (secure hold) until service completion is confirmed.

Q116 (#5): How much does Fixy charge as a platform fee?

A: Fixy charges a 10% commission on the agreed service price. This is retained immediately upon payment.

Q117 (#6): What is escrow and why is it used?

A: Escrow is a secure holding mechanism where the technician's 90% payment is held by the platform and only released after you confirm the service is completed. It protects both you (ensuring you pay only for completed work) and the technician (guaranteeing payment after completion).

Q118 (#7): When does the technician get paid?

A: The technician receives 90% of the service price when you (the customer) confirm that the service has been completed satisfactorily. The funds are released from escrow at that point.

Q119 (#8): What if payment fails during offer acceptance?

A: If the payment fails, the offer acceptance is cancelled and the service request returns to active status, allowing other technicians to still bid.

Q120 (#9): What does the payment look like for a 100 EGP service?

A: Customer pays: 100 EGP. Platform retains: 10 EGP (10% commission). Technician receives in escrow: 90 EGP. Upon service completion: technician withdraws 90 EGP. Total technician earnings: 90 EGP.

Q121 (#10): When is a booking created?

A: A booking is automatically created only after the full payment (100%) is successfully processed following offer acceptance.

Q122 (#11): What information does a booking contain?

A: A booking contains: Booking ID, Customer & Technician information, Service details (category, description, location, schedule), Agreed price, Payment status, Booking status (Active/In Progress), and timestamps.

Q123 (#12): Can a booking be modified after creation?

A: The core details (service description, price, and parties involved) cannot be modified after booking creation. Minor schedule adjustments may be negotiated between the customer and technician through the platform messaging system.

Q124 (#13): Is there any scenario where the platform loses its commission?

A: Yes. If a service is not completed (technician cancelled, service failed, or dispute resolved in customer's favor), the platform refunds the full 100% to the customer, including the 10% commission. The platform only retains its commission when service is successfully completed.

Q125 (#14): Is the full payment charged when I accept an offer?

A: Yes. The full 100% of the agreed service price is charged to your payment method at the moment you accept a technician's price offer. This payment is required before the booking is officially created.

Q126 (#15): What is escrow and how does it protect me?

A: Escrow means the technician's 90% payment is held by the platform in a secure holding state and is not released to the technician until you confirm the service is satisfactorily completed. If the service is not completed or you have a valid dispute, you can receive a full refund.

Q127 (#16): When is the booking officially created?

A: The booking is created automatically only AFTER your payment is successfully processed. If payment fails, the offer acceptance is cancelled and the service request returns to active status.

Q128 (#17): What details are in a booking record?

A: A booking contains: Booking ID, customer information, technician information, service category and description, service location and schedule, agreed price, payment status (escrow held/released), booking status (Active/In Progress/Completed), and creation/service date timestamps.

Q129 (#18): Can the agreed price change after the booking is created?

A: No. The service price (and other core details like parties involved and service description) are immutable after the booking is created. However, minor schedule adjustments can be negotiated through platform messaging between customer and technician.

Q130 (#19): What happens if my payment fails?

A: If the payment processing fails, the offer acceptance is cancelled automatically. The service request returns to 'Active' status and becomes visible again to technicians. You can try accepting an offer again once the payment issue is resolved.

Q131 (#20): How do I get a refund?

A: You receive a full 100% refund (including the 10% platform commission) if: the service is not completed, the technician cancels before completion, or a dispute is resolved in your favor (administrator determines service was not completed). Refunds are processed automatically by the system.

Q132 (#21): Can I pay partially upfront and partially after the service?

A: No. Fixy's payment model requires 100% payment upfront when the booking is created. The platform's escrow mechanism secures the technician's 90% portion and releases it only upon completion confirmation, which achieves a similar protective outcome for both parties.

Q133 (#22): What payment methods does Fixy accept?

A: Fixy accepts major payment methods available in Egypt including credit and debit cards (Visa, Mastercard), mobile wallets (Vodafone Cash, Orange Cash, Etisalat Cash), and bank transfers where supported. The full list of accepted methods is displayed at checkout.

Q134 (#23): Is my payment information stored on Fixy?

A: Fixy does not store raw card details. Payments are processed through a PCI-DSS compliant payment gateway. Tokenised payment references may be stored to facilitate future transactions, but sensitive card data is never retained on Fixy servers.

Q135 (#24): Can I get an invoice or receipt for my payment?

A: Yes. A payment confirmation and receipt are automatically generated after each successful transaction. You can view and download your receipts from the Bookings or Payment History section of the app. Receipts include Booking ID, service details, amount paid, and platform commission breakdown.

Q136 (#25): Can I pay in instalments?

A: No. Fixy requires full payment upfront (100% of the agreed service price) when a booking is created. Instalment payment plans are not currently supported.

Q137 (#26): What currency does Fixy use?

A: Fixy operates in Egyptian Pounds (EGP). All prices, commissions, and refunds are displayed and processed in EGP. International currency support is not available in the current version.

Q138 (#27): Is there a VAT or tax added to service payments?

A: Tax handling depends on applicable Egyptian law. Fixy's platform commission is subject to VAT as required by Egyptian tax regulations. The technician is responsible for their own tax obligations on earned income. Consult a tax advisor for specific guidance.

Q139 (#28): What happens if I am charged but the booking is not created?

A: If payment is successfully processed but a booking fails to be created due to a technical error, the charge is automatically reversed within 3–5 business days. Contact Fixy support immediately with your payment reference number if this occurs.

Q140 (#29): Can I transfer my booking to another technician?

A: No. Once a booking is created with a specific technician, it cannot be transferred. If the technician is unable to fulfil the service, they can cancel (triggering a full refund to you) and you can post a new or reopened service request for other technicians to bid on.

7. Service Completion

20 Q&A pairs

Q141 (#1): How does a technician indicate they have finished the job?

A: The technician navigates to the active booking in the app and marks it as Completed. They may optionally upload completion photos or notes as evidence. The booking status then changes to 'Pending Customer Confirmation'.

Q142 (#2): Can anyone other than the assigned technician mark a service as complete?

A: No. Only the assigned technician can mark a service as completed. Administrators can override this in exceptional dispute resolution cases.

Q143 (#3): Does marking completion release the payment immediately?

A: No. Marking completion only changes the status and notifies the customer. Payment (escrow release) only happens after the customer confirms completion.

Q144 (#4): What do I need to do after the technician marks the job as complete?

A: You will receive a notification. Review the work (and any completion photos provided by the technician), then either: Confirm Completion to release payment, or Raise a Dispute if you are unsatisfied.

Q145 (#5): What happens when I confirm service completion?

A: The 90% escrowed funds are immediately released to the technician. The booking status changes to 'Completed'. You can then submit feedback and a rating.

Q146 (#6): Can I undo my confirmation after releasing payment?

A: No. Confirmation is irreversible once the final payment (escrow release) has been processed. This is why you should raise a dispute if unsatisfied rather than confirm.

Q147 (#7): What if the technician marks the job complete but I disagree?

A: Do not confirm completion. Instead, raise a formal dispute (see Section 8 – Disputes). An administrator will review evidence from both sides and make a binding decision.

Q148 (#8): How does the technician mark a service as completed?

A: The assigned technician marks the booking as completed through the app interface. They may optionally upload completion photos or notes as evidence of work performed. The booking status then changes to 'Pending Customer Confirmation' until the customer reviews and confirms.

Q149 (#9): How do I confirm that the service is done?

A: As the customer, you will receive a notification when the technician marks the service as complete. Open the booking, review the work (and any completion photos provided), and tap 'Confirm Completion' if satisfied. This action triggers the automatic release of the 90% escrow to the technician.

Q150 (#10): What happens immediately after I confirm service completion?

A: The 90% escrow is automatically and immediately transferred to the technician's account. The technician can then initiate a withdrawal. The booking status changes to 'Completed'. You will also be prompted to submit feedback on the technician's service.

Q151 (#11): Can I undo my confirmation after confirming service completion?

A: No. Confirmation is an irreversible action once the final payment (escrow release) is processed. Please carefully review the completed work before confirming.

Q152 (#12): I'm not satisfied with the service. What should I do instead of confirming?

A: Do NOT confirm completion if you are unsatisfied. Instead, raise a dispute through the app. Disputing initiates a formal review process where an administrator examines evidence from both parties and makes a binding decision. Confirming would permanently release the payment to the technician.

Q153 (#13): Can someone other than me confirm the completion of my service request?

A: Under normal circumstances, only the customer who created the service request can confirm completion. However, in cases of customer misconduct (e.g., refusing to confirm without valid reason), an administrator can manually force-confirm the service completion and release the payment.

Q154 (#14): What happens if the technician marks the job done but I never confirm or dispute?

A: The booking remains in 'Pending Customer Confirmation' status. You should either confirm (if satisfied) or raise a dispute (if not). Administrators can intervene in cases of unreasonable delays or customer misconduct.

Q155 (#15): Can the technician submit evidence of completed work?

A: Yes. When marking the service as completed, the technician can optionally upload completion photos or written notes documenting the work performed. This evidence can be used by the customer or administrator in case of a dispute.

Q156 (#16): What if the technician completes part of the work but not all of it?

A: Partial completion is treated as incomplete service. You should not confirm completion. Instead, raise a dispute describing what was not completed. The administrator will review the evidence and determine whether partial payment (or full refund) is appropriate based on the work done.

Q157 (#17): How long do I have to confirm or dispute after the technician marks the job done?

A: The system does not enforce a hard confirmation deadline by default. However, leaving a booking in 'Pending Customer Confirmation' indefinitely may trigger administrator review. Respond promptly — either confirm or raise a dispute — to keep the process moving.

Q158 (#18): Can I request the technician to redo part of the work before I confirm?

A: Yes. Before confirming, you can communicate with the technician through the platform messaging system to request corrections or touch-ups. If the technician is unresponsive or refuses, raise a dispute rather than confirming.

Q159 (#19): Does Fixy guarantee the quality of work done by technicians?

A: Fixy does not provide a direct service quality guarantee, but it enforces quality assurance mechanisms: escrow payment (you do not pay until satisfied), a dispute resolution process, technician ratings and reviews, and anomaly detection on feedback. If work is unsatisfactory, raise a dispute before confirming.

Q160 (#20): What is the service warranty period after completion?

A: Fixy's platform does not enforce a mandatory warranty period. Warranty terms are between the customer and the technician and should be agreed upon before the service starts. Technicians are encouraged to document any warranty commitments in their offer notes.

8. Dispute Handling

30 Q&A pairs

Q161 (#1): When can I raise a dispute?

A: A dispute can be raised after the technician marks the service as completed but before you (the customer) confirm completion. Both customers and technicians can initiate a dispute.

Q162 (#2): What are valid reasons to raise a dispute?

A: Customer disputes: Work quality below expectations, service incomplete, damage caused during service, technician did not arrive. Technician disputes: Customer refuses confirmation despite completed work, additional scope requested beyond agreement, site conditions different from what was described.

Q163 (#3): What information do I need to provide when raising a dispute?

A: You must provide: A detailed explanation of the issue, supporting evidence (photos, descriptions), and your desired resolution.

Q164 (#4): What happens to my payment during a dispute?

A: All payments are frozen during the active dispute investigation. The booking enters 'Disputed' status until an administrator resolves it.

Q165 (#5): Who resolves disputes on Fixy?

A: Only Administrators can review dispute evidence and make binding resolution decisions.

Q166 (#6): How does the administrator resolve a dispute?

A: The administrator: (1) Reviews all submitted evidence and photos from both parties, (2) May request additional information, (3) Determines whether service was completed satisfactorily, and (4) Documents the decision with rationale.

Q167 (#7): What happens if the administrator decides the service WAS completed?

A: The 90% escrowed funds are released to the technician. The booking status changes to 'Completed'. The platform retains its 10% commission.

Q168 (#8): What happens if the administrator decides the service was NOT completed?

A: The customer receives a FULL 100% refund (including the platform commission). The technician receives nothing. The original service request is reopened and becomes visible to other technicians again.

Q169 (#9): Is the administrator's dispute decision final?

A: Yes. The administrative decision is final and cannot be appealed through the platform.

Q170 (#10): What is my refund amount if the dispute is resolved in my favor?

A: You receive a full 100% refund of the original payment – this includes both the 90% that was in escrow and the 10% platform commission.

Q171 (#11): What happens if a customer repeatedly raises unfounded disputes?

A: Administrators can investigate patterns of abuse. Actions may include: issuing a formal warning, blocking the account permanently, or manually confirming service completion and releasing payment on the customer's behalf.

Q172 (#12): Can an administrator block a customer?

A: Yes. Administrators can permanently block customer accounts for serious or repeated misconduct such as refusing to confirm completed work without valid reason or abusing the dispute system.

Q173 (#13): What happens to a blocked customer account?

A: Blocked customers cannot create new service requests or access any core platform features. Account blocks are typically permanent with no reactivation option.

Q174 (#14): How do I raise a dispute?

A: Either the customer or the technician can raise a dispute through the app after the technician marks the service as completed but before the customer confirms. You must provide a detailed explanation of the issue, supporting evidence (photos, descriptions), and your desired resolution.

Q175 (#15): Can a technician also raise a dispute?

A: Yes. Both customers AND technicians can raise disputes. Common technician disputes include: customer refusing confirmation despite completed work, customer requesting additional scope beyond the agreement, or site conditions being different from what was described.

Q176 (#16): What happens to my payment when a dispute is active?

A: All payments are frozen during an active dispute investigation. The 90% escrow remains locked and neither the technician can withdraw it, nor is it refunded to the customer, until the administrator resolves the dispute.

Q177 (#17): What are the possible outcomes of a dispute?

A: Two outcomes are possible: (1) Service Completed — the administrator determines the service was done satisfactorily, 90% escrow is released to the technician, booking is closed as Completed. (2) Service Not Completed — the customer receives a full 100% refund (including platform commission), the service request is reopened for new technician offers.

Q178 (#18): If the dispute is resolved in my favor as a customer, how much do I get back?

A: If the administrator determines the service was NOT completed, you receive a full 100% refund — this includes both the 90% technician escrow and the 10% platform commission. The full amount you originally paid is returned.

Q179 (#19): What happens to the service request if a dispute is resolved as 'Not Completed'?

A: The service request is reopened and becomes visible to technicians again. All previous offers are cleared, so technicians can submit fresh offers based on the service request.

Q180 (#20): What common disputes can customers file?

A: Customers can dispute for: work quality not meeting expectations, service left incomplete, damage caused during the service, or the technician not arriving as scheduled.

Q181 (#21): Can I appeal an administrator's dispute decision?

A: No. The administrator's dispute resolution decision is final and binding within the Fixy platform. There is no formal appeal mechanism through the app. The decision is documented with rationale for transparency.

Q182 (#22): What is customer misconduct in the context of disputes?

A: Customer misconduct occurs when a customer refuses to confirm service completion without a valid reason, repeatedly raises unfounded disputes across multiple bookings, or attempts to obtain free service by refusing confirmation despite evidence of satisfactory work.

Q183 (#23): What action can an administrator take against a misconduct customer?

A: Administrators can: issue a formal warning (for first-time minor infractions), force-confirm service completion and release the technician's payment, or permanently block the customer's account. Blocking prevents the customer from creating new service requests or accessing any platform features.

Q184 (#24): How long does a dispute investigation take?

A: The functional requirements do not specify a fixed SLA for dispute resolution. In production, Fixy targets resolving disputes within 3–5 business days. Complex cases with extensive evidence may take longer. Both parties are notified of the outcome as soon as a decision is made.

Q185 (#25): Can I submit additional evidence after raising a dispute?

A: Yes. During the dispute investigation period, both parties can submit additional evidence (photos, videos, written statements) through the dispute management interface. The administrator may also proactively request additional information from either party.

Q186 (#26): What if I disagree with the administrator's dispute decision?

A: The administrator's decision is final within the Fixy platform. If you believe the decision was made in error or without due process, you can escalate by contacting Fixy's senior support team via email. However, platform-level appeal is not available through the app.

Q187 (#27): Can a dispute be withdrawn after it is raised?

A: A dispute can be withdrawn by the party who raised it if both parties reach a mutual agreement before the administrator makes a decision. Contact support to request a dispute withdrawal. Once an administrative decision is issued, it cannot be reversed.

Q188 (#28): What happens if the technician becomes unreachable during a dispute?

A: If the technician is unresponsive during a dispute investigation, the administrator will make a decision based on the available evidence submitted by the customer. Unresponsiveness from the technician typically weighs in the customer's favour.

Q189 (#29): Can Fixy facilitate direct negotiation between customer and technician during a dispute?

A: The administrator may encourage both parties to communicate and reach a mutual resolution before issuing a binding decision. However, the platform does not enforce direct negotiation — the administrator always has authority to make a final ruling.

Q190 (#30): Is there a limit on how many disputes a technician can have before they are suspended?

A: There is no hard numeric limit specified in the system rules. The administrator monitors dispute patterns. Technicians with a consistently high dispute rate — especially where outcomes favour customers — may have their accounts reviewed, warned, or suspended at the administrator's discretion.

9. Ratings, Reviews & AI

28 Q&A pairs

Q191 (#1): When can I leave feedback for a technician?

A: Feedback can be submitted only after you have confirmed service completion. You cannot leave feedback before the service is officially completed.

Q192 (#2): What does feedback include?

A: Feedback includes: (1) Numerical Rating (e.g., 1-5 stars), (2) Written Review (optional qualitative description), (3) Category Ratings for quality, professionalism, timeliness, and communication (optional).

Q193 (#3): Can I submit more than one review for the same booking?

A: No. Each customer can submit feedback only once per completed booking.

Q194 (#4): Is my feedback visible to other users?

A: Yes. Your feedback is visible to other customers viewing the technician's profile, helping them make informed decisions.

Q195 (#5): How is a technician's rating calculated?

A: Fixy uses an AI-powered Rating Model that analyzes: Historical customer feedback and ratings, Service completion success rate, Customer satisfaction metrics, Response time and reliability, and Dispute history. Recent feedback is weighted more heavily than older feedback.

Q196 (#6): What rating does a new technician start with?

A: New technicians with no feedback history receive a neutral baseline rating to ensure fair opportunity in the marketplace.

Q197 (#7): Is the rating updated in real-time?

A: Yes. The rating is dynamically recalculated after each new feedback submission.

Q198 (#8): What is the Anomaly Detection system?

A: Fixy uses an AI Anomaly Detection Model to identify and filter potentially fraudulent, manipulated, or suspicious feedback before it affects a technician's rating. Each feedback is assigned an Anomaly Score between 0 and 1.

Q199 (#9): What does the system flag as anomalous feedback?

A: The model detects: unusual patterns in rating distributions, suspicious timing of submissions, generic or copied review content, and unusual feedback patterns from specific customer accounts.

Q200 (#10): What happens if my feedback is flagged as anomalous?

A: Anomalous feedback is excluded from the rating calculation. The technician's rating is set to the system-wide average rating instead of using potentially manipulated data. The feedback is retained for administrative review.

Q201 (#11): Does the system tell me if my feedback was flagged?

A: The anomaly detection operates automatically and transparently. Flagged feedback is preserved for admin review but its direct impact on the rating is prevented.

Q202 (#12): How do I submit feedback for a technician?

A: After confirming service completion, you can submit feedback through the app. You provide a numerical star rating (1–5), an optional written review, and optional category-specific ratings for quality, professionalism, timeliness, and communication. You can only submit one feedback per completed booking.

Q203 (#13): When can I submit feedback?

A: Feedback can only be submitted after you have confirmed service completion. You cannot leave a review for a booking that is still in progress or disputed.

Q204 (#14): How is a technician's overall rating calculated?

A: The Rating AI Model calculates ratings using multiple factors: historical customer feedback and ratings, service completion success rate, customer satisfaction metrics, response time, reliability indicators, and dispute history and outcomes. Recent feedback is weighted more heavily than older feedback. New technicians receive a neutral baseline rating.

Q205 (#15): Can fake or manipulated reviews affect a technician's rating?

A: The platform has an Anomaly Detection AI Model that automatically validates all feedback before it affects the rating. It assigns each feedback an Anomaly Score (0 to 1). If feedback is flagged as anomalous (suspicious timing, generic language, unusual patterns), it is excluded from the rating calculation and the technician's rating is set to the system-wide average instead.

Q206 (#16): What is the Anomaly Detection Model looking for?

A: The model detects: unusual patterns in rating distributions (e.g., sudden burst of 5-star reviews), suspicious timing of feedback submissions, generic or copied review text, and unusual feedback patterns from specific customer accounts. Each feedback is given an Anomaly Score between 0 (normal) and 1 (highly anomalous).

Q207 (#17): Does a flagged anomalous review still appear on the platform?

A: Yes, the anomalous feedback is retained in the system for administrative review and transparency, but it is NOT used in the technician's rating calculation. The technician's rating is set to the system-wide average instead of potentially manipulated scores.

Q208 (#18): Is my written review visible to other customers?

A: Yes. Customer feedback and ratings are visible to other customers viewing the technician's profile, helping future customers make informed decisions.

Q209 (#19): Can a technician respond to my review?

A: The functional requirements do not specify a review response feature, so technician responses to individual reviews are not part of the current system design.

Q210 (#20): How does the AI rating model handle new technicians?

A: New technicians who have no feedback history receive a neutral baseline rating. This ensures they have a fair opportunity to appear in recommendation rankings and attract initial customers, rather than being penalized for having no track record.

Q211 (#21): What factors affect my recommendation ranking as a technician?

A: Your ranking when customers view offers is determined by: (1) your Rating Score (highest first), (2) your distance from the service location (if within 25 km), (3) your offer price (lowest first), (4) your cancellation rate (lowest first), and (5) your number of completed jobs (most first).

Q212 (#22): Can I edit my review after submitting it?

A: No. Once feedback is submitted, it cannot be edited or retracted. Please review your rating and written comments carefully before submitting. If you believe your review was submitted in error, contact support — corrections are assessed on a case-by-case basis.

Q213 (#23): Can a technician report a review as fake or unfair?

A: Yes. Technicians can flag a review they believe is fraudulent or retaliatory through the support channel. The Anomaly Detection Model also automatically screens all feedback. Flagged reviews are reviewed by an administrator who can exclude them from the rating calculation if found to be manipulated.

Q214 (#24): How many reviews does a technician need before their rating is considered reliable?

A: The AI Rating Model uses volume consideration — rating confidence increases with the number of completed services. The system does not publish a specific minimum review count, but ratings based on fewer than 5 jobs are treated with lower confidence and weighted accordingly.

Q215 (#25): Does Fixy show the number of completed jobs on a technician's profile?

A: Yes. The technician's completed job count is visible on their profile and is also used as one of the ranking factors in the recommendation module. It provides customers with context for assessing experience.

Q216 (#26): Can a customer see individual star ratings per category (quality, timeliness, etc.)?

A: Yes. When customers submit feedback, they can optionally provide category-specific ratings for quality, professionalism, timeliness, and communication. These sub-ratings are visible on the technician's profile alongside the overall numerical rating.

Q217 (#27): What is a good Anomaly Score and what is a bad one?

A: The Anomaly Score ranges from 0 to 1. A score close to 0 indicates normal, genuine feedback that passes validation and is included in the rating calculation. A score close to 1 indicates highly suspicious feedback that is excluded. The exact threshold for exclusion is determined by the model's configuration and is not publicly disclosed.

Q218 (#28): Does the rating system account for the difficulty of the job?

A: The current Rating AI Model does not adjust for job complexity or category difficulty. Ratings reflect customer satisfaction across all completed bookings equally. Job category context may be considered in future model iterations.

10. Technician Earnings & Withdrawals

20 Q&A pairs

Q219 (#1): How much does a technician earn per job?

A: A technician earns 90% of the agreed service price. The platform retains 10% as a commission fee. Example: for a 500 EGP job, the technician earns 450 EGP.

Q220 (#2): When can a technician withdraw their earnings?

A: A technician can withdraw earnings only after: (1) The customer confirms service completion, (2) The escrowed funds (90%) are released, and (3) There are no active disputes on the booking.

Q221 (#3): How does a technician withdraw earnings?

A: The technician initiates a withdrawal request through the platform interface. The system verifies the available balance and eligibility, then transfers funds to the technician's registered bank account or payment method.

Q222 (#4): How long does a withdrawal take?

A: Withdrawal processing time depends on the payment method, typically 1-5 business days.

Q223 (#5): Can a technician withdraw funds that are still in escrow?

A: No. Escrowed funds are visible in the account balance but cannot be withdrawn until they are released after service completion confirmation.

Q224 (#6): What if there is a dispute on a booking – can I still withdraw those earnings?

A: No. Earnings tied to a booking under active dispute are frozen and cannot be withdrawn until the dispute is resolved.

Q225 (#7): How much do I earn per service as a technician?

A: You earn 90% of the agreed service price. The platform retains 10% as a commission. For example, if the customer accepted your \$200 offer, you receive \$180. The 10% (\$20) is the platform fee.

Q226 (#8): When can I withdraw my earnings?

A: You can withdraw earnings after: (1) the customer confirms service completion (or administrator determines service was completed in a dispute), (2) the 90% escrow is released to your account, and (3) there are no active disputes on the booking.

Q227 (#9): How do I withdraw my earnings?

A: Initiate a withdrawal request through the app. The system verifies your available balance and eligibility, then transfers the funds to your registered bank account or payment method. You will receive a transaction confirmation. Processing typically takes 1–5 business days depending on the payment method.

Q228 (#10): Can I see my pending (escrowed) earnings?

A: Yes. Escrowed funds are visible in your account balance, but they are clearly marked as locked/unavailable. You cannot withdraw them until the escrow is released.

Q229 (#11): What happens to my earnings if there is a dispute?

A: During an active dispute, all your escrowed earnings are frozen. You cannot withdraw them until the administrator makes a resolution decision. If the dispute is resolved in your favor (service completed), the 90% escrow is released. If not, the funds are refunded to the customer.

Q230 (#12): Is there a minimum withdrawal amount?

A: The platform may enforce a minimum withdrawal amount to reduce transaction costs. Check the app's withdrawal screen for the current minimum threshold, as this may vary.

Q231 (#13): What payment methods can I use to receive withdrawals?

A: You must have a verified bank account or payment method registered in the app. The system verifies your payment method before processing withdrawals. Supported methods may include bank transfer and other options shown in the app.

Q232 (#14): If the customer disputes and wins, do I lose my commission?

A: If the dispute is resolved as 'Service Not Completed,' the customer receives a full 100% refund (including the platform commission). You receive no payment for that job. However, the 10% commission is also returned to the customer in this scenario — the platform does not retain it when service is not completed.

Q233 (#15): Are technician earnings taxable on Fixy?

A: Yes. Technician earnings are considered income and are subject to applicable Egyptian tax laws. Fixy provides earnings records and withdrawal history through the app for tax reporting purposes. Technicians are responsible for declaring and paying their own income tax. Consult a tax advisor for specific guidance.

Q234 (#16): Can I set up automatic withdrawal of earnings?

A: Automatic (scheduled) withdrawal is not currently supported. Technicians must manually initiate each withdrawal request through the app. Auto-withdrawal may be introduced in a future platform update.

Q235 (#17): Is there a withdrawal fee?

A: Fixy may charge a small transaction fee for withdrawals depending on the payment method (e.g., bank transfer fees). The applicable fee, if any, is displayed at the time of the withdrawal request before you confirm. Fixy's own platform commission is already deducted at the time of booking — there is no additional platform fee on withdrawals.

Q236 (#18): What is the maximum amount I can withdraw at once?

A: There is no platform-imposed maximum withdrawal limit per transaction. However, your bank or payment provider may impose daily or per-transaction limits. The withdrawal amount is limited to your available (non-escrowed) balance.

Q237 (#19): Can I split a withdrawal across multiple bank accounts?

A: No. Each withdrawal is sent to the single registered bank account or payment method on file. To change the destination, update your registered payment method before initiating the withdrawal.

Q238 (#20): How do I track my earnings history?

A: The app provides a full earnings dashboard showing: completed bookings, per-job earnings, escrowed amounts, released amounts, withdrawal history, and pending balances. All transactions are timestamped and can be exported for record-keeping.

11. Administration & Monitoring

14 Q&A pairs

Q239 (#1): What can an administrator do on Fixy?

A: Administrators have full platform oversight: Account Management (approve/reject/block users), Dispute Management (review evidence, make binding decisions, process refunds), Service Request Management (reopen requests, cancel fraudulent ones), AI System Monitoring (review AI decisions, override when needed), and Platform Oversight (monitor health, generate reports, manage settings).

Q240 (#2): Are administrator actions logged?

A: Yes. All administrative actions are recorded in an audit trail with timestamp, admin identity, and rationale. Affected users are notified with a clear explanation.

Q241 (#3): Can an administrator override AI decisions?

A: Yes. Administrators can override AI recommendation or anomaly detection decisions when appropriate, with required documentation of the reason.

Q242 (#4): What is the difference between Administrator and Customer Service on Fixy?

A: They are the same role. Administrator and Customer Service are unified with identical permissions and responsibilities.

Q243 (#5): Can an administrator approve my account registration?

A: Yes. Account approval is an exclusive administrator function. No other user role can approve accounts. Once approved, you receive a notification and gain full access to platform features appropriate to your role.

Q244 (#6): Can an administrator block my account?

A: Yes. Administrators can suspend or permanently block accounts for serious misconduct (repeated unfounded disputes, fraud, policy violations). A blocked customer cannot create new service requests; a blocked technician cannot view or bid on requests.

Q245 (#7): Can an administrator override a customer's refusal to confirm completion?

A: Yes. In cases of clear customer misconduct — where a customer refuses to confirm without a valid reason — the administrator can manually force-confirm the service completion and release the technician's escrowed payment.

Q246 (#8): Do administrators see all bookings and transactions?

A: Yes. Administrators have full visibility into the platform — all user accounts, service requests, bookings, transactions, disputes, and AI model outcomes. This comprehensive monitoring enables effective platform oversight.

Q247 (#9): Is there a difference between 'Administrator' and 'Customer Service' roles?

A: No. 'Administrator' and 'Customer Service' are the same role on Fixy with identical permissions and responsibilities. Both terms refer to the same type of platform operator account.

Q248 (#10): How do administrators detect fraudulent activity on the platform?

A: Administrators use a combination of tools: the Anomaly Detection AI Model flags suspicious review patterns, dispute history analysis identifies repeat offenders, account activity monitoring detects unusual registration or bidding behaviour, and manual review of flagged accounts. Administrators can also act on reports submitted by users.

Q249 (#11): Can an administrator change the price of a completed booking?

A: No. The agreed booking price is immutable after booking creation. Administrators cannot alter the agreed service price. They can, however, determine payment distribution outcomes through dispute resolution (full release vs. full refund).

Q250 (#12): How do I report a technical bug or app issue to Fixy?

A: Use the 'Report a Problem' option in the app's Help & Support section, or email bugs@fixy.app. Include your device model, OS version, app version, a description of the issue, and screenshots if possible. The technical team will investigate and respond.

Q251 (#13): Can administrators export platform data for reporting?

A: Yes. The administrative dashboard supports data export for bookings, transactions, user accounts, dispute outcomes, and AI model decisions. Reports can be generated by date range and exported in CSV or PDF format for business reporting and compliance purposes.

Q252 (#14): What compliance standards does Fixy follow?

A: Fixy is designed to comply with Egyptian data protection regulations, PCI-DSS standards for payment processing, and applicable consumer protection laws. The platform conducts National ID verification in line with Egyptian KYC (Know Your Customer) requirements.

12. Notifications

13 Q&A pairs

Q253 (#1): How does Fixy notify users about events?

A: Fixy sends notifications through: (1) In-app Notifications – real-time alerts within the app, (2) Email – for important events sent to your registered email, and (3) SMS (optional) – for critical notifications if configured.

Q254 (#2): What events trigger notifications?

A: Notifications are sent for: account approval/rejection/blocking, new price offers, offer acceptance/rejection, service request updates, payment confirmations, escrow lock/release events, booking creation and completion, dispute raised/resolved, and new feedback received.

Q255 (#3): Will I know when my offer is accepted or rejected?

A: Yes. Technicians receive a notification when their offer is accepted (with next steps) and when their offer is automatically rejected because another technician was selected.

Q256 (#4): Do customers get notified about new price offers?

A: Yes. Customers receive a notification each time a technician submits a new price offer, including the technician's profile summary and offer amount.

Q257 (#5): What notifications will I receive as a customer?

A: As a customer you receive notifications for: account approval/rejection, new price offer received (with technician summary and amount), offer acceptance confirmation, payment confirmation (escrow created), booking created confirmation, technician marked service complete (action required), dispute status updates, escrow release/refund confirmation, and your feedback receipt by the technician.

Q258 (#6): What notifications will I receive as a technician?

A: As a technician you receive notifications for: account approval/rejection, offer acceptance (your offer was selected), other offers automatically rejected, payment/escrow confirmation (90% held until completion), service request updated (your prior offer invalidated), service completion confirmation and escrow release, dispute status updates, and withdrawal confirmation.

Q259 (#7): How does Fixy send notifications?

A: The platform uses push notifications (via the mobile app) and email as notification channels. Key lifecycle events trigger automatic notifications to relevant parties.

Q260 (#8): Will I be notified if the customer edits their service request?

A: Yes. If the customer edits a service request, all technicians who previously submitted offers for that request will receive a notification informing them that the request has been updated, their previous offer is invalidated, and they may submit a new offer based on the updated requirements.

Q261 (#9): Will I get a notification when a dispute is resolved?

A: Yes. When an administrator makes a dispute resolution decision, both the customer and the technician involved receive a notification. The notification includes the outcome (service completed or not completed), the payment actions taken, and a brief rationale for the decision.

Q262 (#10): Can I customise which notifications I receive?

A: Yes. The app's Notification Settings allow you to toggle specific notification types on or off (e.g., mute new offer alerts but keep payment confirmations). Critical notifications such as dispute updates and payment confirmations cannot be disabled as they are essential for platform operations.

Q263 (#11): Why am I not receiving notifications?

A: Check the following: (1) Ensure push notifications are enabled for the Fixy app in your device settings, (2) Confirm your registered email is correct and check your spam folder, (3) Ensure you have a stable internet connection. If the issue persists, contact support.

Q264 (#12): Can Fixy send WhatsApp or SMS notifications?

A: SMS notifications are supported as an optional channel for critical events. WhatsApp integration is not currently available. Check your notification settings in the app to enable SMS alerts if your account is configured for it.

Q265 (#13): How quickly are notifications delivered?

A: In-app and push notifications are delivered in real-time as events occur. Email notifications are typically delivered within 1–2 minutes. SMS delivery depends on network conditions and your carrier.

13. Edge Cases & Special Scenarios

28 Q&A pairs

Q266 (#1): What happens if a technician submits an offer and then the customer edits the service request?

A: All existing offers including that technician's offer are automatically invalidated. The technician receives a notification and must re-evaluate the updated requirements before submitting a new offer if they wish.

Q267 (#2): Can a service request have multiple active bookings?

A: No. Each service request can have only one active booking at a time.

Q268 (#3): What happens to a service request after a dispute is resolved in the customer's favor?

A: The service request is reopened and becomes visible to other technicians again. All previous offers are cleared, and technicians can submit new fresh offers.

Q269 (#4): Can a customer get a partial refund?

A: No. Refunds on Fixy are always 100% of the total paid amount. There are no partial refunds. Either the service is completed (technician earns 90%) or it is not (customer gets 100% back).

Q270 (#5): What if a technician wants to cancel after the booking is created?

A: If a technician cancels before service completion, the customer receives a full 100% refund. This event may also negatively impact the technician's cancellation rate and overall ranking score.

Q271 (#6): Can a customer book multiple services simultaneously?

A: Yes. Customers can create multiple service requests across different categories. Each request is managed independently.

Q272 (#7): What if no technicians submit offers for my service request?

A: Your service request remains active and visible to qualified technicians. You may consider editing the description or schedule to attract more responses. The system does not automatically cancel unanswered requests.

Q273 (#8): Can the same technician bid on multiple different service requests at once?

A: Yes. A technician can submit offers on multiple different service requests simultaneously, as long as each request matches their service category.

Q274 (#9): What happens if a customer account is blocked mid-booking?

A: Administrators handle exceptional cases. An administrator may manually confirm service completion and release payment to the technician if the blocking is due to confirmed misconduct by the customer.

Q275 (#10): Is there a minimum or maximum price for a service offer?

A: The system does not specify a hard minimum or maximum. However, Fixy may enforce a minimum withdrawal amount to reduce transaction costs.

Q276 (#11): What happens if the technician cancels before completing the service?

A: If the technician cancels before completing the service, the customer receives a full 100% refund (including the 10% platform commission). The service request may be reopened for new offers from other technicians.

Q277 (#12): Can a customer accept an offer and then immediately cancel?

A: Post-acceptance cancellation follows the exception handling process. The customer would need to raise this through the dispute or support channel. If service has not started, an administrator may process a refund depending on circumstances.

Q278 (#13): What if a technician submits an offer and the customer never responds?

A: Offers remain valid until the service request is cancelled, accepted (another offer wins), or the service request is edited by the customer. There is no automatic expiry specified for open offers.

Q279 (#14): Can two customers book the same technician at the same time?

A: The system does not explicitly limit concurrent bookings per technician in the functional requirements. However, technicians are expected to manage their availability responsibly, and the platform's scheduling and messaging tools enable coordination.

Q280 (#15): What if I accidentally confirm service completion before checking the work?

A: Confirmation is irreversible once the escrow is released. Please always review the work carefully before confirming. If you confirmed by mistake and the work is substandard, you may need to contact the administrator — however, there is no automatic reversal mechanism in the current system.

Q281 (#16): What happens to my service request if the technician's account is blocked?

A: If an active technician's account is blocked during a booking, the administrator would handle this as an exceptional circumstance — potentially cancelling the booking and issuing a refund, then reopening the service request.

Q282 (#17): Can a customer see which technician the system recommends most?

A: Yes. When a customer views price offers, technicians are displayed in the order determined by the rule-based recommendation module (rating → distance → price → cancellation rate → completed jobs). The top-ranked technician appears first. Customers retain full autonomy to select any technician regardless of their ranking position.

Q283 (#18): What if my service request gets no offers?

A: If no technicians submit offers for your service request, you can try: updating the description for more clarity, adjusting the schedule, or waiting for technicians in the area to become available. There is no automatic escalation — you manage your open request until it receives offers.

Q284 (#19): Can an anomalous review hurt a technician even if it is flagged?

A: No. Anomalous reviews are excluded from the rating calculation entirely. Instead, the technician's rating is set to the system-wide average, which is a neutral protection measure. The anomalous review is kept for administrative audit but does not negatively impact the technician's score.

Q285 (#20): What is the maximum distance for a technician to see a service request?

A: The system filters by 'reasonable geographic proximity,' and for ranking purposes, the distance threshold is 25 km (technicians within 25 km are ranked by distance in the second tier). The exact maximum discovery radius is a system configuration parameter.

Q286 (#21): What happens if Fixy's servers go down during a payment?

A: Payment processing uses a reliable third-party payment gateway with its own redundancy. If a payment is interrupted, the gateway ensures no double-charging occurs. If funds are deducted but the booking is not created, the charge is automatically reversed. Contact support with your payment reference if you experience issues.

Q287 (#22): What if a technician arrives but the customer is not home?

A: The technician should document their arrival (photo of location with timestamp) and notify the customer through the platform. If the customer remains unreachable, the technician can raise a dispute citing customer no-show. The administrator will review the evidence and may force-complete the service or issue a partial resolution.

Q288 (#23): Can a customer change the service location after booking?

A: No. The service location is fixed at booking creation and cannot be changed. If the location must change, the booking should be cancelled through the dispute/support channel and a new service request created at the correct location.

Q289 (#24): What happens during a public holiday — are services still available?

A: Fixy operates 24/7 as a platform. Whether services are available on holidays depends on technician availability. Technicians set their own schedules — some may be available on holidays while others are not. Service request visibility and bidding are not restricted on public holidays.

Q290 (#25): What if the service price is disputed after a booking is created?

A: The agreed price is locked at booking creation and cannot be renegotiated through the platform. If the scope of work changes significantly after booking, both parties should communicate through platform messaging. For major scope changes, a new service request may be required. Disputes about price are handled by the administrator.

Q291 (#26): Can a technician sub-contract the job to another person?

A: No. The booking is between the registered technician and the customer. Sub-contracting is not permitted. Only the registered technician can perform and mark the service as completed. Sending an unregistered third party to perform the job may result in dispute resolution going against the technician.

Q292 (#27): What if the customer and technician agree to settle outside the platform?

A: Off-platform settlements are against Fixy's terms of service. All payments, disputes, and confirmations must go through the platform to maintain escrow protection and dispute coverage for both parties. Settling outside the platform voids your dispute rights and escrow protection.

Q293 (#28): Can I use Fixy for commercial or industrial service requests, not just home repairs?

A: The current platform is designed for home repair and maintenance services. Commercial or industrial service requests may be created, but technicians registered under residential service categories may not be qualified for commercial work. Use the description field clearly to indicate the nature and scale of the job.

14. Security, Trust & Platform Integrity

12 Q&A pairs

Q294 (#1): Is my payment secure on Fixy?

A: Yes. Fixy uses an escrow payment model — your money is never sent directly to the technician at the time of booking. The 90% technician portion is held securely by the platform and only released to the technician after you confirm the service is completed. If the service is not completed, you get a full refund.

Q295 (#2): How does Fixy prevent fake technicians?

A: All technician accounts require a National ID for identity verification and must be approved by an administrator before accessing the platform. This manual review process ensures only legitimate technicians can browse requests and submit offers.

Q296 (#3): How does Fixy protect against fake reviews?

A: The Anomaly Detection AI Model automatically validates all feedback before it affects ratings. It detects suspicious patterns (unusual timing, generic text, abnormal distributions) and excludes anomalous reviews from the rating calculation, protecting technicians from fraudulent rating manipulation.

Q297 (#4): What prevents a customer from getting free service by refusing to confirm?

A: The platform has a Customer Misconduct mechanism (FR-18). Administrators monitor patterns of unreasonable refusals. If a customer refuses to confirm without a valid reason, the administrator can force-confirm the completion and release the technician's payment. Repeated misconduct leads to permanent account blocking.

Q298 (#5): How does Fixy ensure only qualified technicians get jobs?

A: The account approval process verifies technician identity before they can access the platform. The rule-based recommendation module then ranks technicians by rating, completion history, reliability, and proximity — ensuring the best-qualified technicians are shown first to customers. Document Summary Category # Q&A; Pairs Topics Covered

Q299 (#6): How does Fixy protect my personal data?

A: Fixy encrypts all personal data (National ID, contact information, location) at rest using AES-256 encryption and in transit using TLS 1.2+. Data access is role-restricted — only administrators can view sensitive user information, and only for verification or dispute resolution purposes.

Q300 (#7): What should I do if I suspect my Fixy account has been hacked?

A: Immediately contact Fixy support through the in-app help channel or email security@fixy.app. Change your password immediately via the 'Forgot Password' flow. The security team will review account activity, temporarily lock the account if suspicious activity is confirmed, and guide you through account recovery.

Q301 (#8): Does Fixy conduct background checks on technicians?

A: Fixy currently verifies technician identity through National ID validation during the admin approval process. Formal criminal background checks or professional licence verification are not part of the current onboarding flow. The rating and review system, combined with the escrow payment model, provides practical accountability.

Q302 (#9): Can someone create a fake service request to scam technicians?

A: The platform has several safeguards: customers must have a verified, admin-approved account before creating requests; payment is collected upfront before the technician travels to the location; and administrators monitor for suspicious request patterns. Technicians are advised to review customer ratings and history before accepting jobs.

Q303 (#10): Is Fixy's AI model biased against new technicians?

A: No. The recommendation system explicitly assigns new technicians a neutral baseline score to ensure fair market entry. This prevents established technicians from permanently monopolising top ranking positions and gives new entrants a fair opportunity to win their first jobs and build their rating.

Q304 (#11): How does Fixy handle a data breach?

A: In the event of a data breach, Fixy follows its incident response protocol: immediate containment, assessment of affected data, notification to affected users within 72 hours (in compliance with applicable regulations), coordination with authorities if required, and a post-incident security review to prevent recurrence.

Q305 (#12): Can Fixy employees access my payment information?

A: Fixy employees cannot access raw payment card details — these are handled exclusively by the PCI-DSS compliant payment gateway. Administrators can view transaction amounts, booking IDs, and payment status for support and dispute purposes, but not card numbers, CVVs, or bank account credentials.

15. App UI & Navigation

41 Q&A pairs

Q306 (#1): How do I log in to Fixy?

A: Open the Fixy app and you will see the Login screen with two fields: User (email) and Password. Enter your registered email and password, then tap the blue 'Login' button. If you registered with Google or Apple, tap the corresponding social login button. If you do not have an account yet, tap 'Don't have an account? Register' at the bottom.

Q307 (#2): How do I sign up for Fixy?

A: On the login screen tap 'Don't have an account? Register' or 'Sign Up'. The Create Account screen opens with fields for: Full Name, Last Name, User Name, Email, Password, Confirm Password, and Address. Fill in all fields, then tap the blue 'Sign Up' button at the bottom. Your account will be created with Inactive status and must be approved by an administrator before you can access the platform.

Q308 (#3): Can I sign in with Google or Apple on Fixy?

A: Yes. On the Login screen you will see a Google button and an Apple button below the main login form. Tap either to authenticate using your Google or Apple account. You will still need to complete your profile with a National ID for administrator verification before your account is approved.

Q309 (#4): How do I switch between logging in as a customer or technician?

A: The login screen shows 'Fixy — Technician and Customer Services' at the top, indicating a unified login for both roles. Your role is determined by the account type you registered with. After logging in, the app automatically shows the correct home screen based on your registered role.

Q310 (#5): How do I reset my password?

A: On the Login screen tap 'Forgot Password?' below the Login button. Enter your registered email address and tap Send. You will receive a password reset email. Open it, tap the reset link, enter your new password twice, and confirm. Return to the app and log in with your new password.

Q311 (#6): What can I do from the Fixy home screen as a customer?

A: The customer home screen shows your name at the top with a greeting, a grid of Service Categories (Plumbing, AC Repair, Cleaning, Electrical, etc.), a 'Popular Services' list with provider photos and ratings, and a 'Book a Service' button at the bottom. You can tap any category to browse services or tap 'Book a Service' to start a new service request.

Q312 (#7): How do I book a service on Fixy?

A: Tap 'Book a Service' on the home screen. The booking flow has 7 steps shown at the top: (1) Select Service category, (2) Select Address, (3) Select Time, (4) Booking Details, (5) Payment, (6) Confirmation, (7) Track. Follow each step, fill in the required information, and tap 'Continue' to advance. You can go back at any step using the back arrow.

Q313 (#8): How do I select a service category when booking?

A: In Step 1 of the booking flow (Select Service), you see category icons in a grid: Home, Plumbing, AC Repair, Electrical, Cleaning, Pool Plumbing, Landscaping, and more. Tap the category that matches your need. You can also use the search bar at the top to find a specific service. Tap 'Continue' after selecting.

Q314 (#9): How do I enter my address when booking a service?

A: In Step 2 of the booking flow (Select Address), you see a map view with your current location pinned. You can type a new address in the search bar, drag the map pin to your exact location, or tap 'Add New Address' to save a new address. Once the correct location is set, tap 'Continue'.

Q315 (#10): How do I schedule the date and time for my service?

A: In Step 3 (Select Time), a calendar view appears at the top where you tap the date you want. Below the calendar is a time slot selector — tap your preferred time. The selected date and time are highlighted. Tap 'Continue' when done. You can go back to change the date at any point before confirming.

Q316 (#11): How do I review my booking details before paying?

A: In Step 4 (Booking Details), you see a summary of your booking including the service type, location, scheduled date and time, and the technician assigned. A map shows the service location. Review all details carefully and tap 'Continue' to proceed to payment.

Q317 (#12): How do I pay for my booking?

A: In Step 5 (Payment), you see the total amount, a breakdown (Parts & Materials, Price to fix), and the Grand Total. You are then shown available payment options. Enter your card details (card number, expiry, CVV) in the Card Details section and tap 'Confirm Booking' to complete the payment. The full amount is charged upfront and held in escrow.

Q318 (#13): What happens after I confirm a booking?

A: After payment, Step 6 shows a 'Booking Confirmed' screen with a green checkmark, your Booking ID (e.g. BK-1 8003), and the technician's name and profile photo. You will also see a 'Message Technician' button and a 'Track Booking' button. Tap 'Track Booking' to follow the job progress in real time.

Q319 (#14): How do I track my active booking?

A: Tap 'Track Booking' from the confirmation screen or open 'My Bookings' from the bottom navigation bar and tap your active booking. The tracking screen shows the technician's name, your booking ID, status updates in a timeline, and a 'Message Technician' button. You will receive push notifications at each status change.

Q320 (#15): What is shown on the service warranty details screen?

A: After a service is completed, tapping 'Warranty Details' on the booking shows: the service name, a 5-star rating selector, cover level, the technician's name and rating, booking date, recent services performed, warranty timeline with dates, and two buttons: 'Help & Support' and 'File a Claim'. This documents what the technician did and any warranty coverage offered.

Q321 (#16): How do I file a warranty claim?

A: Open the completed booking, tap 'Warranty Details', review the warranty timeline, then tap 'File a Claim' at the bottom of the screen. Fill in the claim description and submit. The claim will be reviewed by the Fixy support team and the relevant technician will be contacted.

Q322 (#17): How do I register as a technician on Fixy?

A: On the login screen tap 'Become a Technician' or register with the Technician role. The Personal Info screen asks for: Full Name, Address (with a map pin), National ID (NID No.), Department, Years of Experience, and Expected Salary. Fill in all fields and tap 'Continue'. You will then go through document verification before your account is submitted for administrator approval.

Q323 (#18): What documents do I need to upload to register as a technician?

A: The Verify Documents screen asks you to upload: your National ID front and back photos, a Certification document, and a Background Check document. Tap each upload slot to select photos from your gallery or take new ones. All four documents must be uploaded before you can tap 'Submit to Review'.

Q324 (#19): How long does technician verification take?

A: After submitting your documents, your account enters review. The verification screen shows a pending status with a note that the Fixy team will review your submitted National ID and certifications. You will receive a push notification once your account is approved or if additional information is needed. Review typically happens within 1-2 business days.

Q325 (#20): What does the technician home screen show?

A: The technician home screen shows your name and toggle switch at the top to set your availability (Online/Offline). Below is a summary of upcoming bookings, a quick stats section (earnings, completed jobs), and a bottom navigation bar with tabs: Home, Bookings, Availability, Earnings, and Profile.

Q326 (#21): How do I set myself as available or unavailable for jobs?

A: On the technician home screen, tap the toggle switch next to your name at the top right. When the toggle is green/on you are set as Online and visible to customers. When off you are Offline and will not receive new job requests. You can also manage your availability schedule from the Availability tab.

Q327 (#22): How do I view and manage my upcoming bookings as a technician?

A: Tap the 'Bookings' tab in the bottom navigation bar. You will see a list of all bookings with the customer name, service type, date, and status. Tap any booking to open the Job Detail screen where you can see the full address on a map, job description, amount, and action buttons including 'Mark as Complete'.

Q328 (#23): How do I view the full details of a job I have been assigned?

A: From the Bookings tab tap the job card. The Job Detail screen shows: the customer's name and profile photo, service type, description, address with map, scheduled date and time, booking amount, uploaded photos from the customer, and buttons to 'Track the Job' or 'Mark as Complete'. Tap 'Track the Job' to open the full timeline view.

Q329 (#24): How do I mark a job as completed?

A: Open the active booking from your Bookings tab. On the Job Detail screen, scroll to the bottom and tap 'Mark as Complete'. A confirmation dialog appears asking 'Marking as complete?' with two options: 'Continue' to confirm or 'Cancel' to go back. Tap 'Continue' to submit the completion. The booking status changes to Pending Customer Confirmation and the customer is notified.

Q330 (#25): How do I manage my availability schedule as a technician?

A: Tap the 'Availability' tab in the bottom navigation bar. You see a weekly calendar grid showing your time slots (e.g. 08:30 AM–11:00 AM, 11:00 AM–01:00 PM, etc.). Toggle individual time slots on or off to mark yourself as available or busy for each period. Changes take effect immediately and affect which jobs you can receive during those times.

Q331 (#26): How do I check my earnings as a technician?

A: Tap the 'Earnings' tab in the bottom navigation bar. The earnings screen shows your total balance (e.g. EGP 1,240.00), a Withdraw button, and a breakdown of: Pending Balance, Available Balance, and Total Earnings. Below is a line chart showing your earnings trend over the selected period, and a transaction history list showing each completed booking with date and amount.

Q332 (#27): How do I withdraw my earnings?

A: On the Earnings screen tap the green 'Withdraw' button next to your available balance. Enter the amount you want to withdraw, confirm your registered bank account or payment method, and tap 'Confirm Withdrawal'. Processing takes 1–5 business days. You will receive a notification when the transfer is completed.

Q333 (#28): What is shown in the technician earnings transaction history?

A: The earnings transaction history shows a list of completed bookings with: the customer name, service date, booking amount in EGP, and the payment status (Completed or Pending). Amounts are shown in green for received payments. Tap any transaction to see the full booking detail for that job.

Q334 (#29): How do I view and edit my technician profile?

A: Tap the 'Profile' tab in the bottom navigation bar (person icon, far right). Your profile screen shows your photo, name, email, and star rating at the top, followed by a summary of services offered, recent earnings, and a list of recent customer reviews. Tap 'Edit Profile' (pencil icon) to update your name, photo, specialisation, or contact details.

Q335 (#30): How do I add or update the services I offer as a technician?

A: On your Profile screen tap 'Edit Profile'. In the edit screen you can update your services list. Tap 'Add Service' to add a new service type under your registered category, or tap an existing service to edit its details. Note: your primary service category cannot be changed after registration — contact support if you need a category change.

Q336 (#31): How do I access my settings in the Fixy app?

A: Tap the 'Settings' icon (gear icon) in the bottom navigation bar or tap your profile picture in the top-left corner of the home screen. The Settings screen shows your profile photo, name and email at the top, followed by options: Account Settings, Security, Notifications, Help Centre, Terms of Service, and a red 'Logout' button at the bottom.

Q337 (#32): How do I log out of the Fixy app?

A: Open Settings by tapping the gear icon in the bottom navigation bar. Scroll to the bottom of the Settings screen and tap the red 'Logout' button. A confirmation dialog appears — tap 'Confirm' to log out. You will be returned to the Login screen. Your account data and booking history are saved and available when you log back in.

Q338 (#33): How do I change my notification preferences?

A: Open Settings and tap 'Notifications'. You will see toggles for each notification type: new bookings, payment confirmations, dispute updates, promotional messages, and more. Toggle each one on or off to match your preferences. Critical notifications like payment and dispute alerts cannot be disabled.

Q339 (#34): How do I approve or reject a technician registration as an admin?

A: In the admin panel, open the 'Technician Management' section. Find the pending technician in the list — they will have an 'Approve' (green) and 'Reject' (red) button on their card. Review their profile details and submitted documents, then tap 'Approve' to activate their account or 'Reject' to decline. The technician is notified immediately.

Q340 (#35): How do I manage customer accounts as an admin?

A: In the admin panel open 'Customer Management'. You will see a searchable list of all customers with their name, photo, email, and status. Each customer card has action buttons: 'Approve', 'Reject', or 'Block'. Use the search bar or filters at the top to find specific customers. Tap a customer's name to open their full profile.

Q341 (#36): How do I handle a refund or dispute as an admin?

A: In the admin panel open 'Refunds & Disputes'. The screen shows a list of all disputes with columns for customer/technician names, booking ID, amount, and status badges (Submitted, In Review, Resolved). Each dispute has 'Approve Refund' (green) and 'Reject Refund' (red) buttons. Tap the dispute to view full evidence before making a decision.

Q342 (#37): How do I send a broadcast notification to all users as an admin?

A: In the admin panel open 'Broadcast Notification'. Enter a Title and Message in the text fields provided. Select the target audience (All Users, Customers only, or Technicians only) using the dropdown or toggle. Tap 'Send/Publish' to broadcast the notification immediately to all selected users. A preview of the notification appears at the top.

Q343 (#38): How do I view platform analytics as an admin?

A: In the admin panel open 'Disputes Analytics' or the Analytics section. You will see a date filter at the top, export buttons for CSV and Excel, a summary card showing total revenue (e.g. EGP 42,500.03), and bar charts showing dispute trends over time. A Category Performance section at the bottom shows booking volume by service category.

Q344 (#39): How do I manage service categories as an admin?

A: In the admin panel open 'Categories Management' (or 'System Settings > Categories'). You will see a list of existing service categories such as Plumbing, Cleaning, Electrical, AC Repair, Home Repair, HVAC, and more. Each has an edit (pencil) and delete (trash) icon. Tap 'Add New Category' at the top right to create a new service category with a name, icon, and description.

Q345 (#40): How do I view all bookings across the platform as an admin?

A: In the admin panel open 'All Bookings'. The screen shows a filterable list of all bookings with tabs: All, In Progress, Completed, Cancelled. Each booking card shows the Booking ID, customer and technician names with photos, service type, amount, and a status badge. Tap any booking to view full details, transaction history, and take administrative action if needed.

Q346 (#41): How do I review a specific customer or technician as an admin?

A: In the admin panel open 'Customer Detail' or 'Technician Profile' by tapping a user's name from the management list. The detail screen shows their full profile, contact information, recent bookings, rating, earnings (for technicians), and any dispute history. Admin action buttons are available at the top to Approve, Block, or message the user.

Document Summary

Section	Q&A Pairs	Key Topics
1. Platform Overview	20	Platform overview, purpose, technology stack
2. Registration & Account Management	28	Customer & technician registration, admin approval
3. Service Requests	25	Create, edit, cancel service requests
